

About Groupe Gorgé

Established in 1990, Group Gorgé is an industrial group operating in different areas of expertise:

Smart Safety Systems — Using technology to work in risk environments;

Protection in Nuclear Environments — Protecting people and securing buildings operating with radioactive materials;

Industrial Projects & Services Conducting Robotics and Fire protection systems projects for industry and service-sector player;

3D Printing — Enabling major industry players to find new routes to successful innovation and production processes by providing systems, 3D printers and new premium material.

In 2015, the Group reported revenue of €264.5 million. It is backed by 1,536 employees and operations in over ten countries.

Platinum 3D: Champagne-Ardenne Technological Industries Training Center is now equipped with a Prodways ProMaker L6000 3D printer

At the “Commission Industrie” event, held on Friday, January 20th at the Champagne-Ardenne Technological Industries Training Center of Charleville-Mézières, Platinum 3D will introduce its latest equipment: the 3D printer ProMaker L6000 from Prodways, a subsidiary of Groupe Gorgé. At this event, Platinum 3D is organizing several technical discussions regarding the possibilities provided by the MOVINGLight® technology, mainly in the fields of machining operations, foundry tooling, plastics processing and industrial control.

- **Platinum 3D: a cutting-edge technological & scientific platform**

Platinum 3D is a technologic and scientific platform dedicated to the production of metallic parts through additive manufacturing processes.

Open to all (companies, public & private laboratories, technical centers, training centers, etc.) and equipped with significant training and research & development tools, Platinum 3D supports its customers in the industrialization of additive manufacturing processes, most notably in the key fields of tooling, wearing parts and high dimensions parts.

Objectives of Platinum 3D are numerous:

- increase the use additive manufacturing in compnies and improve user skills
- create and innovate in key industrial applications
- promote the emergence of new partnership projects (R&D, training, etc.)
- become an entry point to common means

Groupe Gorgé – Nathalie LAGOS – Communication Manager – Tél : +33(0)1 44 77 94 86 – E-mail : n.lagos@groupe-gorge.com

In order to support industrial companies in their projects, Platinum 3D owns a Technological Industries Training Center equipped with latest additive manufacturing technologies in Champagne-Ardenne.

At the “Commission Industrie” event on Friday, January 20th, Platinum 3D will showcase the ProMaker L6000 from Prodways, which is the latest addition to the Center’s 3D printing equipment line-up.

Based on MOVINGLight® technology, patented by Prodways, the ProMaker L6000 functions by executing the polymerization of photosensitive resins using moving DLP (Digital Light Processing) UV rays, delivering a unique combination of high resolution and fast throughput.

Thanks to its high production capacity combined with a high level of precision, this industrial 3D printer offers huge potential for industrial tooling applications.

This announcement displays the commitment to the common objectives of Prodways and Platinum 3D to make available technological & scientific tools that allow companies to develop and maintain a high level of competency, and also to deliver products with high differentiation, allowing them to be more competitive in their growing markets.

####

About Prodways

Prodways, a subsidiary of Groupe Gorgé, assists major industrial firms with innovations and production processes by providing high-end solutions for additive manufacturing. Prodways’ strategic positioning is to combine the necessary technological solutions with the capacity to provide services and support necessary to help companies develop and meet industrial challenges by:

- providing a top-quality, state-of-the art industrial solution
- providing a complete range of technologies to meet their needs in terms of productivity and reliability
- developing materials suited to industrial constraints (mechanical properties, biocompatibility, flammability, etc.)
- proposing product design and engineering and consulting on production technologies and processes
- qualifying business processes beforehand by creating test parts and process simulations
- proposing manufacturing solutions for back-up and peak reduction
- investing in innovative players in the 3D ecosystem.

Prodways is now one of the few players able to overcome all industrial challenges and boost the emergence of additive manufacturing in series production. Prodways’ offer is backed up by additional activities that enable it to position itself as a serious rival to the two global market leaders and also become the only company outside the USA to offer clients a wide range of 3D printing technologies and a complete range of 3D printing services.

Disclaimer

This press release could contain statements on past events and forward-looking statements including statements regarding future goals or targets. Forward-looking statements reflect current expectations for results and future events.

Such forward-looking statements and targets depend on known and unknown risks, uncertainties and other factors that may cause actual results, performance or events to differ materially from those anticipated herein. All these risks and uncertainties could affect the Group's future ability to achieve its targets. Risks, uncertainties and other factors that could cause actual results to differ materially from the results anticipated in the forward-looking statements and targets include, among other things: the risks and uncertainties possibly mentioned in this press release; the strength of competition; the growth of the market; currency fluctuations; interest rate fluctuations; raw materials and freight price fluctuations; armed conflicts or political instability; control of costs and expenses; changes in tax legislation, rules, regulation or enforcement; our ability to successfully keep pace with technology changes; our ability to attract and retain qualified personnel and key-men; the evolution, interpretation and uniform application and enforcement of International Financial Reporting Standards (IFRS), according to which we prepare our financial statements; supply chain bottlenecks; the performance of our business partners (subcontractors, agents, suppliers, etc.).

Some of these risk factors are set forth and detailed in our Document de Référence (Registration Document including the annual financial report filed with the French Autorité des Marchés Financiers). This list of risks, uncertainties and other factors is not limitative. Other non-anticipated, unknown or unforeseeable factors could also have material adverse effect on our targets. The Group expressly disclaims any obligation or undertaking to update or revise any forward-looking statements or targets potentially contained in this press release to reflect any change in events, conditions, assumptions or circumstances on which any such statements are based.
